

A woman with brown hair tied back, wearing a blue denim shirt, is smiling and peeling a white label off a white jar lid. On the wooden table in front of her are several jars of homemade preserves with labels: "HOMEMADE CHUTNEY", "MUM'S RADISH", "HOMEMADE STRAWBERRY JAM", "ORANGE MARMALADE", and "FAVOURITE SAUCE". A brown paper shopping bag filled with groceries is also on the table. The background shows a bright kitchen with a window looking out onto greenery.

REMOVABLE LABELS

**STICKS SECURELY. PEELS OFF CLEANLY.
REMOVES WITHOUT LEAVING ANY RESIDUE.
REWRITE IF NECESSARY. DONE.**

Made in Filderstadt Germany!

Short distances and state-of-the-art facilities,
from the self-adhesive materials to removable labels

This is how quality is created – from raw material to label

The adhesive material for HERMA labels is manufactured with the highest precision on state-of-the-art coating machines – for maximum printing reliability and trouble-free application. The entire production process takes place at a single location, from raw material processing to the finished label. Short distances reduce transport requirements and conserve resources. Quality, sustainability, and efficiency – Made in Germany.

Company-owned laboratory

The HERMA laboratory is a crucial part of the company, ensuring both the innovative strength and the reliability and quality of its products

- **Driving innovation:**
Solutions tailored to customer requirements are developed quickly and efficiently.
- **Guaranteeing the highest quality:**
Every batch of labels is checked to ensure it meets strict standards.
- **Tested and approved:**
HERMA peel-off labels feed smoothly through the printer – with no paper jams.
- **Speed and flexibility:**
Market trends are identified quickly, and new products are consequently developed accordingly.
- **Promoting sustainability:**
Research and testing help HERMA to develop environmentally friendly products.

Material composite

Short distances and state-of-the-art facilities –
from self-adhesive material to removable labels.

Adhesive materials

The adhesive backing of the peel-off labels consists of three main components.

Label materials

Removable paper (white)

White speciality paper, chlorine-free bleached, FSC™ Mix Credit certified.

Removable paper (yellow, red, blue, green)

Solid-coloured, satin-finished speciality paper, chlorine-free bleached, FSC™ Mix Credit certified.

Removable paper (opaque)

White speciality paper, with a purple coating on the reverse side for excellent opacity, chlorine-free bleached, FSC™ Mix Credit certified.

Polyester film – removable (white)

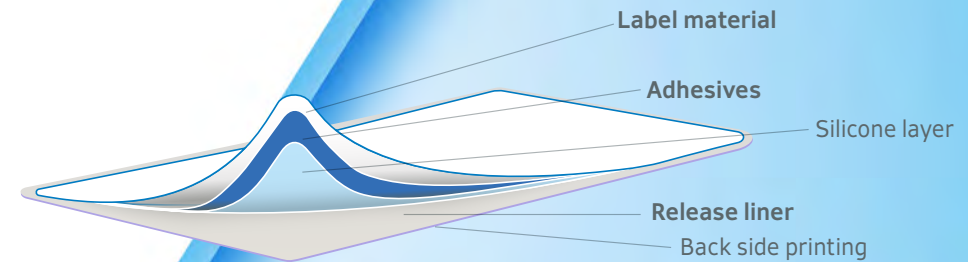

White matt, hard-wearing polyester film (PET), tear-resistant, weather-resistant and temperature-resistant, UV- and ageing-resistant, PVC-free.

Adhesives

This removable, solvent-free, water-based acrylate adhesive is free from plasticisers and acids, and is pH-neutral. It also comes with an ISEGA safety certificate.

Release liner

The release liner used is a white, single-sided coated kraft paper made from chlorine-free bleached pulp, optimised for suppleness and a smooth reverse side.

Removable labels

Temporary labelling – removable, clean, reliable!

- **Temporary marking without damaging the surface:**

They are used when information is only temporarily valid or changes regularly (e.g. stock, dispatch, price and promotional labelling) and the label needs to be removed cleanly at a later date. They are particularly suitable for cardboard boxes, PE films and steel, amongst other applications. The removable adhesive is designed to provide a defined level of adhesion and is ideal for all types of temporary labelling.

- **White and coloured paper labels for clear organisation:**

White paper is suitable for neutral labelling; coloured paper labels aid visual organisation, prioritisation and process logic (e.g. product groups, status, responsibilities) without making the system 'permanent' – because the labels can be removed again.

- **Matt white – reduces glare, improves readability:**

The matt white label material minimises glare and ensures reliable identification of information and barcodes, particularly for standardised labelling in warehousing, logistics and the office.

- **Opaque coating prevents show-through – for clear information:**

In this product range, an opaque coating on the reverse side ensures excellent opacity: previous markings do not show through, thereby reducing mix-ups and the transmission of incorrect information within workflows.

- **Polyester film – the removable solution for harsher environments:**

Removable PET film labels are used in situations where labels are subjected to greater mechanical stress or environmental influences (e.g. smudge resistance). They combine durable material with a removable application.

Removable labels

for changing information – on paper and film

- Adhere securely and can be removed without leaving any residue – ideal for temporary labelling
- Versatile for use in offices, retail, warehouses, production facilities or at home
- Available in paper or polyester film – suitable for a range of indoor and outdoor applications

The right solution for changing information

Removable labels are used wherever information is only needed temporarily or needs to be updated regularly. In commercial settings, they help streamline processes in offices, warehouses, retail and production environments. At home, they ensure flexible organisation and clear labelling. Depending on the application, paper offers the ideal solution for standard organisational tasks, whilst polyester film is the perfect choice wherever extra durability is required.

Removable labels

Paper, white

- Adheres securely and peels off without leaving any residue
- Opaque versions reliably cover up old lettering
- Excellent print results on all standard laser and inkjet printers
- Smooth handling thanks to optimal flatness

The mark of responsible forestry

 **HERMA**

For everything that might change

Removable HERMA labels are the ideal solution when labels need to be changed or removed regularly. They adhere reliably, can be removed cleanly, and ensure a tidy appearance. White versions are suitable for changing labels, whilst opaque versions are also ideal for securely covering existing information. This makes labelling simple, flexible and professional.

Removable labels

Polyester film, white

- Durable polyester film – weatherproof, UV-, temperature- and ageing-resistant
- Sticks well yet peels off without leaving any residue
- Ideal for outdoor use – e.g. shop window stickers, product labels or temporary signs
- Resistant to oil, dirt and moisture

Powerful in use, flexible to remove

In the commercial sector, removable film labels are the ideal solution for temporary product labelling, warehouse signage, whiteboard signs and property labels. In the home, too, they provide practical and durable labelling – for example, on storage boxes, appliances, windows or outdoor furniture. They combine high durability with the flexibility required when information needs to be changed.

The back tells the story...

The item number printed on the back of each sheet makes it easy to identify sheets that have already been removed from the package. It also ensures that the item number selected in the software matches the sheet. This reliably prevents misprints. Reordering is no problem either, even if only one sheet is left.
